

Please add new claims 5-8:

5. The process for producing at least one biochip according to claim 4, wherein the injecting step includes repeatedly replacing one of said biochip placed underneath a injecting head of the inkjet device and injected with the first solution with another of said biochip so as to produce a plurality of biochips.
6. The process for producing at least one biochip according to claim 4, wherein the injecting step includes repeatedly moving an injecting head of the inkjet device above a substrate of another biochip and injecting the first solution thereon so as to produce a plurality of biochips.
7. The process for producing at least one biochip according to claim 4, further comprising: repeatedly moving said biochip relative to an injecting head of the inkjet device and repeatedly injecting the first solution from the inkjet device to a substrate to different spots of the substrate.
8. The process for producing at least one biochip according to claim 4, wherein the putting step includes putting the first solution into the inkjet device prior to putting the second solution into the inkjet device.

IN THE DRAWINGS:

Please enter the attached corrected drawings Figs.7 and 8A-C, in which the legend of "Prior Art" is being added, to replace Figs. 7 and 8A-C as originally filed. A Letter to Draftsperson is also submitted herewith.
